

The earth's made of air, land and water
We certainly need them, all three.
The earth's made of air, land and water
The best place for you and for me!

Green earth, green earth
Keep air, land and water so clean
Green earth, green earth
Let's keep the whole earth very clean.

The air on the earth is around it
It's there even though you can't see
All living things need it for breathing
The air is important to me.

The land on the earth is important
With mountains and valleys and plains
The land is where our food is growing
Like veggies and fruits and grains.

The water on earth is amazing
Huge oceans and rivers and lakes
It helps living things to keep growing
With ice, snow and rain that it makes.
